

## SOFT SPRAY THE COMPLETE POWDER COATING CONCEPT IN A MODULAR SYSTEM

### Powder furthering system DDF

The future of powder dosage got a name: Digital Density Feeding DDF

**SOFT SPRAY** works practically air free from the original container to the spray organ. Through exact steered DDF powder pumps you dose accurate, reproducible, gentle, dustless and without wear of the powder lines. The feed air, which disturbs with its high speed and considerable volume in the application, is dropped here complete.

#### Ramseier powder furthering systems for all automatic coating processes

- ✓ Due to SOFT SPRAY up to 20% powder savings are possible.
- ✓ Automatic cleaning of the pump and powder tubes by use of 2 cleaning programs.
- ✓ Practically air free from the original container to the spray organ.
- ✓ Reduced maintenance
- ✓ Fast color changes
- ✓ Short installation time for upgrades complete in 2 ½ days over the weekend.
