

SOFT SPRAY THE COMPLETE POWDER COATING CONCEPT IN A MODULAR SYSTEM

Fully automatic tube changer DDF pump to application

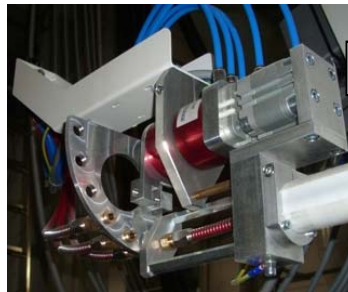

Operating efficiency and reliability in coating technology

Fully automatic tube changer are used for extreme color changes, for example from smooth to structured powder. Within seconds the powder pipe is changed to the application and to the DDF pump ending.

In combination with the other SOFT SPRAY components a complete new concept in powder coating!

Ramseier color change systems for all automated coating processes

- ✓ Fully automatic tube change within seconds!
- ✓ For highest claims to the color change.
- ✓ High level of automation, with autonomous control for a simple upgrade on existing systems.
- ✓ Tube change unit extendable on 1-6 powder pipes.
- ✓ Tube change unit DDF pump rack ending modular available for 8/12/16/20/24/32 applicators with up to 6 connections.
